Depth	19mm
Weight	480g
EAN/UPC	5060329432987

Materials

Exterior	Silicon
Hand strap	Ballistic Nylon
Inner	Polycarbonate
Colour	Black

Description

The armourdog® rugged case for the iPad Air 2 delivers a complete protection system without adding unnecessary bulk or weight. The perfect accompaniment to the iPad when being used in a business environment such as retail, queue busting, hospitality, healthcare etc. The inner polycarbonate protective shell is remarkably strong, and locks the iPad in place with a latch that can be further secured with a Kensington lock if required. The thick, outer silicon wrap dissipates impact energy across a wide area, while innovative corner bumpers protect the iPad if it's dropped, 'screen down'. Our ergonomically designed, ballistic Nylon hand strap reduces fatigue when used for extended use in landscape or portrait orientation. The removable shoulder strap is adjustable, padded, comfortable, and can be secured to each corner. The removable shoulder strap pouch can be used to secure another device such as an MPoS chip-and-pin payment device, barcode scanner or smartphone. The pouch comes in various sizes and can be customised to fit your specific device. We can add your company logo to the cover and customise the case colours, dependent on order volume.

We pride ourselves in the top quality materials and manufacturing process we use, which is why all armourdog® products are backed with a 2 year manufacturing defect warranty.
